DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-21, the phrase "and the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being

Art Unit: 2644

examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by the article :“Towards Multidocument Summarization by Reformulation: Progress and Prospects”.

The article teaches a method of providing summaries of documents belonging to a class of a classified document collection comprising (figure 3):

“ inducing a set of rules...” (his rule induction)

‘Comparing extracted words, phrases, terms...’; (his analysis component);and

“Providing a summary of the individual incoming input document...” (His generation component).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2644

5. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldstein (Automatic Text Summarization of Multiple Documents) in view of Cohen (Fast Effective Rule Induction)

As per claims 1-21 Goldstein teaches a method of providing summaries of documents belonging to a class of a classifies document collection comprising:

“ comparing extracted words, phases terms appearing in the set of rules from the sample set of documents to an individual incoming document”; (section 2.2, his multi-document, page 7 and section 3.4);and

“Providing a summary of the individual incoming document...” (page 3, a multi-document summarizer...; section 2.2, page 7 section 3.4, his multi-document summarization).

It is noted that Goldstein teaches the claimed invention but does not explicitly teach inducing a set of rules from a sample set of documents, the set of rules being characteristic of the sample documents. However, this feature is well known in the art as evidenced by Cohen who teaches a fast effective rule induction that induces a set of rules from a collection of documents. Therefore, one of ordinary skill in the art at the time the invention was made would have it obvious to incorporate into the multi-document summarizer of Goldstein the rule induction systems as taught by Cohen because it would provide an efficient system capable of learning rules with a high degree.

As per claims 2-14, the combination teaches providing more than one individual incoming document (see Goldstein , his multi-document summarizer); comparing the more than one

individual incoming input document with the extracted words...input document (The combination of multi-document summarizer with the induction rules).
